Complete your in-office arsenal with PROPEL

PROPEL FITS WITHIN YOUR IN-OFFICE PRACTICE

Improve sinus surgery outcomes for your patients with chronic rhinosinusitis (CRS) by offering PROPEL implants in your in-office practice through a two-pronged approach: in-office sinus procedures or postoperatively.

**CLINICAL APPLICATION**

- Intended for use following sinus surgery to maintain patency, thereby reducing the need for postoperative surgical intervention and use of oral steroids\(^1\)\(^-\)\(^3\)
- Separate mucosal tissues, provide stabilization of the middle turbinate, prevent obstruction by adhesions, and reduce edema/inflammation\(^1\)\(^-\)\(^3\)
- Innovative 2-in-1 technology that opens the sinuses while delivering mometasone furoate directly where it is needed\(^1\)\(^-\)\(^3\)

**COVERAGE**

- Positive coverage and access with commercial payors, such as UnitedHealthCare, Highmark, CareFirst, and HCSC\(^*\)
- Positive coverage and access with government payors such as VA, Blue Cross Blue Shield FEP, and select Medicare plans\(^*\)
- Billing a CPT code for in-office use of PROPEL implants is applicable

**VALUE TO YOUR PRACTICE**

- Easily loaded; fast and precise deployment
- Innovative technology for your patients with CRS, with tools to facilitate patient outreach
- Dedicated team to assist with payor coverage and reimbursement
- Tailored care for your patients with PROPEL implants: Implants of varying sizes and shapes indicated to treat the frontal, maxillary, and ethmoid sinuses\(^1\)\(^-\)\(^3\)

**IN-OFFICE SINUS PROCEDURES**

1. Implants following in-office ESS such as balloon sinus dilation

**POSTOPERATIVE UTILIZATION**

2. Implants during the postoperative healing period after sinus surgery
